

A Fast, Simple and Free* Way To Enable Teleworking From Home

If you're already forwarding your business phone number or extension calls to your cell phone, this is better.

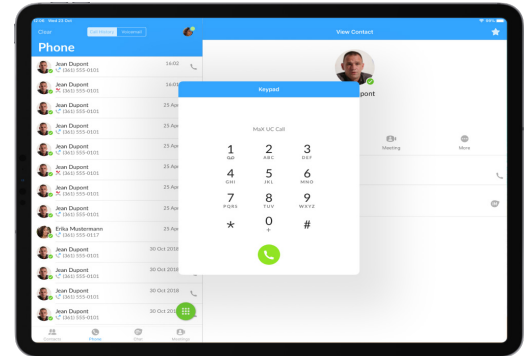

You can take advantage of this offer even if you are in contract with your current voice provider, and it can work with many systems. Call us to see if it might work for you.

MaX UC Meeting for Windows/Mac

MaX UC smartphone app

MaX UC tablet app

How it works: We supply you with a local direct dial phone number and a password. You download and log in to POPP's MaX UC teleworking app on your smartphone, tablet, and/or computer.

Inbound Calls: Simply use call forwarding on your desk phone or with your current provider to forward inbound calls to the POPP-provided telephone number. You can then answer calls using the MaX UC app on your smartphone, tablet or computer. Unanswered calls go to a voicemail box included with the app.

Outbound Calls: Place outbound calls using the app or the web portal. Those you call will recognize it is you because your business phone number appears on Caller ID. Your personal phone number remains private.

Audio/Video Conferencing (Included Through June 30th): Host conferences with up to 100 people, share your screen, use a whiteboard, and more.

Benefits:

- Make outbound business calls that show your usual business phone number on Caller ID
- Keep your personal cell phone number private
- Incoming business calls look and ring different than personal calls, so you can answer them differently
- Keep your business and personal voicemail greetings and messages separate
- Collaborate via audio/video conferencing
- When your work day is over, log out of MaX UC to send any future business calls directly to voicemail

Each User Includes:

- A Direct Inward Dial (DID) number
- MaX UC Smartphone, Tablet, and Computer Apps
- Web Portal Access
- Voicemail with Voicemail-to-Email Notification
- Audio/Video Conferencing Capability (Until June 30)

Everything Can Be Done Quickly and Remotely!

- No Equipment to Install
- No Technician Dispatch Required
- No Contract

Free Audio/Video Conferencing will be discontinued June 30th. Free use of the app for voice calls may continue beyond June 30th, depending on the state of the COVID-19 crisis at that time. When free voice calling service ends, you may opt to continue using it at just \$4.95/mo./user. The MaX UC app is the teleworker component of POPP's Internet Phone System.

*POPP is waiving all one-time or recurring monthly fees for this service for the duration of the COVID-19 crisis. You pay only the government mandated taxes and surcharges, and any long distance usage charges. POPP reserves the right to discontinue this service at any time.
