Release notes are published here once they are made available to POPP from the manufacturer - Microsoft/Metaswitch.

The release dates of features and fixes listed below are set by Microsoft/Metaswitch and are subject to change at any time.

Overview

POPP's MaX UC Mobile application is updated periodically with features and fixes for iOS and Android which are listed below.

Upcoming <u>iOS</u> Release – October 31, 2022   V3.10 Software Update V3.10.00 SU10

	Summary	Description
1.	Incorrect contact matching with short codes	On MaX UC on iOS, if short codes are configured that match the final few digits of a contact they can incorrectly match and display incoming calls as if from the short code, even if that is not configured on that contact.
2.	Enhancements to Meetings on MaX UC Mobile	New layout and ability for participants to send non-verbal feedback and emojis to meeting host.

Previous <u>iOS</u> Release – August 22, 2022   V3.02 Software Update V3.02.00 SU30

	Summary	Description
1.	Users can get locked out after changing password elsewhere.	On MaX UC on iOS, if a user changes their password on another device or in CommPortal, iOS will remember the old password and automatically try to log in with it, potentially locking the user out of their account.
2.	Badge number does not always update correctly.	On MaX UC on iOS, the badge number for unread notifications does not always update correctly for missed calls and hence some items can be missed.
3.	Blank screen when opening the app when call is ringing.	On MaX UC, opening the app via the home screen when a call is ringing results in a blank screen being displayed.
4.	Unattended Call Transfer always shows in tour screens.	On MaX UC on iOS, during the tour screens users are always shown how to do an unattended call transfer even if their Class of Service doesn't allow that feature.

Upcoming Android Release – October 31, 2022   V3.10 Software Update V3.10.00 SU10

	Summary	Description
1.	Missing space when using Samsung swipe keyboard	On MaX UC on Android, when using the Samsung Swipe keyboard to type an IM, there will be no space added between the first two words
2.	Adding/removing group chat participants doesn't update participants screen	On MaX UC on Android, adding or removing participants in a group chat doesn't update the member list under 'View Participants'
3.	New VM/fax notification reappears after being dismissed	On MaX UC on Android, when receiving a notification for a new voicemail or fax, dismissing the notification (rather than viewing it) results in the notification reappearing again shortly afterwards for the same VM/fax.
4.	Users can be forced to re-login every day when using e-mail login	On MaX UC on Android, users who use e-mail to login can be required to login afresh every day even if they left their phone logged in overnight.
5.	Enhancements to Meetings on MaX UC Mobile	New layout and ability for participants to send non-verbal feedback and emojis to meeting host.

Previous Android Release – August 22, 2022   V3.02 Software Update V3.02.00 SU30

	Summary	Description
1.	Crash when attempting to schedule a meeting.	On MaX UC on Android, attempting to schedule a meeting will cause the app to crash.
2.	Members added to group chat while offline won't see it.	On MaX UC on Android, if a user is added to a group chat while they are offline they won't see the group chat or any messages for it, even after logging in.
3.	App doesn't stop attempting a second call when call hold is disabled.	On MaX UC on Android, if Call Hold is disabled in the Class Of Service, the app doesn't stop you making a second concurrent call from within the app itself.
