

Release notes are published here once they are made available to POPP from the manufacturer - Microsoft/Metaswitch. The release dates of features and fixes listed below are set by Microsoft/Metaswitch and are subject to change at any time.

Overview

POPP's MaX UC Desktop application is updated periodically with features and fixes which are listed below.

Upcoming Release - October 24, 2022 V3.10 Software Update V3.10.00 SU20

	Summary	Description
1.	Users in different BGs using the same device can potentially view both sets of chat contacts.	On MaX UC on Desktop, if a user fails to login for a network related reason and then a user from a different business group logs in on that device, the second user may be able to see chat contacts for both business groups.
2.	Hang on startup.	On MaX UC on Desktop, the client can sometimes hang when starting up.
3.	Can't send IMs when in a call on non-MaX device.	On MaX UC on Desktop, if using Line State Monitoring with an associated deskphone, users can't send IMs from MaX when in a call on the deskphone.
4.	Missing chat messages whilst offline.	On MaX UC on Desktop, users who receive messages in 1 to 1 chats whilst offline may not see them when logging in again.
