

Voice Operator Panel

Improve efficiency and customer service with a tool that helps your operators answer and transfer calls more quickly and accurately.

POPP's Voice Operator Panel is a customizable softphone application for operators and receptionists, featuring extension status monitoring and intuitive drag-and-drop call transfer.

The Voice Operator Panel app can be used with a computer and USB headset as a softphone, or connected to an IP desk phone to speak over the telephone handset or headset.

Voice Operator Panel also features integration with Microsoft® Outlook, and can be configured with windows for working in a CRM or for sending emails - all in the same screen.
