

Release notes are published here once they are made available to POPP from the manufacturer - Microsoft/Metaswitch. The release dates of features and fixes listed below are set by Microsoft/Metaswitch and are subject to change at any time.

Overview

POPP's MaX UC Desktop application is updated periodically with features and fixes. Updates from the past 6 months are listed below.

Upcoming Release – January 1, 2025 V3.21.23.26804

	Summary of Fixes	Description
1.	Minor Bug Fixes	Fix to address the following: On rare occasions, MaXUC Desktop can start with a blank black screen, rendering the client unusable.

Upcoming Release – July 8, 2024 V3.21.00 SU17

	Summary of Fixes	Description
1.	Incoming calls when using direct calling may result in calls not being routed for 30 seconds.	On MaX UC Desktop, if a line is part of an MLHG and has direct calling disabled, then any incoming call to the line will be rejected by the MaX UC client and result in the switch routing no further calls to any devices on the line for the next 30 seconds.

Previous Release – April 9, 2024 V3.21.11 SU 12

	Summary of Fixes	Description
1.	Cannot transfer calls to non-contacts.	On MaX UC on Desktop, attempting to transfer a call to a manually inputted number (as opposed to selecting a contact) will fail.

Previous Release – April 2, 2024 V3.21

	Summary of Updates in this Release
1.	<ul style="list-style-type: none"> • Extend support for distinctive ringing • Allow subscribers to opt out of call quality rating from the call rating window • Display incoming (international) numbers in E.164 number format • Provide subscriber in-app setting for preferred Caller ID • Bug fixes
